FOR IMMEDIATE RELEASE

January 4, 2021

Vaccine Update:

If you are a Health Care Worker in Atchison County that would like to receive a COVID Vaccine and have not yet been vaccinated please call our office at (913) 367-5152. You will be placed on a list and scheduled at a later date.

Moderna vaccine comes in a multidose vial (10 doses/vial) and once a vial is opened it must be used within 6 hours, therefore we must schedule accordingly.

PLEASE NOTE:

At this time, per KDHE guidelines we are only able to vaccinate health care workers and EMS staff. As soon as KDHE provides guidance for the next phase of vaccine recipients that information will be released to the public.

We appreciate your patience during this very challenging time. Our office continues to experience large call volumes.

Lori Forge RN

Atchison County Health Officer
